DHRITHI MV

dhrithimalyav@gmail.com — 7338096097 — linkedin.com/in/dhrithi-mv — github.com/DhrithiMV

Professional Summary

AI focused undergraduate looking to employ hands-on experience in data analysis using Python and AI application development. Experience in data cleansing, data manipulation, SQL querying, Power BI dashboarding. Expertise in retrieval-based AI systems, vector databases, and end-to-end project workflows.

Education

PES College of Engineering, Mandya 2023 – Present
Bachelor of Engineering in Computer Science and Engineering(AI & ML) CGPA: **8.27**

Technical Skills

- **Programming Languages:** Python, MySQL
- **Web Technologies:** Angular, JavaScript, HTML5, CSS3, Bootstrap
- **Data Analytics:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), KPI Analysis
- **Visualization:** Tableau, Microsoft Excel, Power BI
- **AI APIs:** OpenAI API, Google Gemini API
- **Tools:** Git, GitHub, VS Code, PyCharm, Microsoft Office, Knime

Professional Experience

Talencia Global – RADIX Program April 2026 - May 2026
AI Engineering Intern

- Designed enterprise level AI solutions and worked through the entire software development life cycle including business requirements analysis, system design, implementation, testing, deployment, and documentation.
- Developed normalized relational database schemas, designed structured data models, and parameter frameworks for scalable and maintainable enterprise applications.
- Developed automation workflows using Python, implemented metadata-driven testing methodologies, and conducted debugging, validation, and quality assurance to enhance system dependability.
- Developed AI-based research and semantic intelligence solutions by combining agentic workflows, vector databases, embeddings, and machine learning approaches for intelligent data processing.
- Experience with containerized services, CI/CD pipelines, DevOps practices and scalable software architecture for production-ready cloud deployments.
- Collaborated with mentors and cross-functional teams to design secure, scalable enterprise systems, maintaining technical documentation, version control using Git/GitHub, and iterative software development practices.

Projects

Misinfo Shield

- Developed a web application to detect fake news using Machine Learning and NLP techniques for classification and analysis of news content.
- Python, Machine Learning, Deep Learning, NLP, Data Preprocessing, Excel
- Tested and debugged application modules to improve the overall reliability and performance of the system.

Restaurant Operations System (ROS) – Data Analytic

- Developed Restaurant Operations System (ROS) for efficient processing of operational data and reporting.
- Created ETL workflows for extraction, transformation, validation and organization of operational data.
- Developed structured MySQL databases and built interactive Power BI reports for business monitoring.
- Ensured data accuracy through validation, documentation, and quality assurance processes.

Certifications

AWS Academy Graduate - Data Engineering - Training Badge March 2026
XPM 4.0 Fundamentals May 2024

Leadership Experience

Social Innovation Team Lead (IIC - PESCE) Dec 2024 – Present

- Led student innovators by organizing technical and non-technical events, workshops, and awareness programs in collaboration with faculty and IIC volunteers to foster innovation, entrepreneurship, and leadership among students.

Graphic Designer & Technical Team Member (GDG - PESCE) Sep 2024 – Present

- Contributed to design and technical initiatives, worked extensively with Google tools, and conducted workshops for 60+ students in collaboration with GDG volunteers and faculty, enhancing technical awareness and practical skills.
